

# Mapping our Growth

## TOP TIPS

The best outdoor rooms have colour and interest all year round. Add plants in each of the four seasons to create interest 365 days.

**Shade or sun?** Where does the sun rise?

Answer:

Is your space over shadowed by neighbours buildings or trees? Take pictures of what is outside your boundary and bring them with your map. Create different spaces of interest so you can enjoy outdoor living all day.

**A room to grow.** Easy gardening or something to maintain?

Answer:

Do you want an instant effect or will you enjoy nurturing plants and seeing your room grow and establish over the years to come?

**Future proof.** Will your footprint always be this big?

Answer:

Will the dimensions remain the same for the foreseeable future or are you contemplating a conservatory, greenhouse or garden office? If you are then consider gardening in pots and raised planters in the relevant areas so everything can easily be moved before building starts.

**Scale.** What scale have you drawn to? e.g. 1cm square = 1m square

1cm square =
